Skills

Effective at time management and task allocation.

Proficient in deploying web applications on cloud platforms (PaaS), integrating CI/CD with GitHub Actions, and configuring basic web security.

Understanding of SIEM operations, rule configuration for basic attack detection, and using dashboards/log analysis for incident investigation.

Languages

English

Vietnamese

Profile

A results-oriented and passionate final-year Cybersecurity student specializing in cloud and endpoint security. Proven ability to deliver hands-on academic projects involving secure application deployment on Microsoft Azure and real-time monitoring with Wazuh. Eager to apply technical knowledge in a professional environment and contribute to building robust, secure systems.

Academic Project

Cloud Computing Project – Web App Deployment & Security | Team Leader

Jun 2025 – Jul 2025

- **Situation:** My team was assigned to develop and deploy a secure cloud-based web application as part of a university project.
- **Task:** As team leader, I was responsible for overseeing the project, ensuring robust security, delegating tasks, and coordinating the team's workflow.
- **Action:** Lead a team of 3 to deploy secure web app on Azure. Set up HTTPS, WAF, IP restrictions,... Automated CI/CD with GitHub Actions. Applied cloud security best practices. Delivered project meeting all requirements.
- **Result:** Completed the project on time with all required functionalities, and received positive feedback from the instructor.
- **GitHub Link:** <https://github.com/cnmcg135/Doan-Cloud.git>
- **Demo Link:** <https://tinyurl.com/yeyjkkth>

Endpoint Security in LAN Environment using Wazuh | Team Leader

Jun 2025 – Jul 2025

- **Situation:** Our campus lab environment required enhanced endpoint security and real-time monitoring due to increased unauthorized access attempts.
- **Task:** As the team leader, I was responsible for designing the overall system, assigning roles, and ensuring the effective implementation of security monitoring.
- **Action:** Lead a team of 3 to design and set up endpoint security monitoring using Wazuh. Monitored real-time events, tuned rules for threat detection, created custom alerts, and improved security visibility for the campus lab.
- **Result:** Completed the project on time with all required functionalities, and received positive feedback from the instructor.
- **Demo Link:** <https://tinyurl.com/mppzj7c>
